

## SENSORY-BASED INTERVENTION DATA COLLECTION

---

This is an example of a data sheet that can be used in a classroom to help determine the efficacy of the weighted lap pad. Information about the goals for attention, sitting in chair (during circle, in assembly), keeping hands to self, etc. are noted at the top of the page. Baseline of pre-lap pad use will serve as a good comparison to use of the lap pad. Incidents can include out of seat behavior, inattention, inappropriate interactions with peers, etc.

Student's Name: \_\_\_\_\_ Implemented by: \_\_\_\_\_

Goal of intervention/targeted outcomes: \_\_\_\_\_

\_\_\_\_\_

Recommended frequency (days, times per day etc.): \_\_\_\_\_

Intervention process/procedure: (Example statements are provided below)

1. Prior to transition out of classroom provide the student...
2. At the beginning of a class have the student...
3. Every 30 minutes...
- 4.
- 5.

## SENSORY-BASED INTERVENTION DATA COLLECTION

---

**BASELINE DATA:** Frequency or duration of behavior the sensory strategies will address.

Date	Target Behavior	Activity/Routine Observed	Duration of Observation	Number of Incidents	Duration of Incidents	Comments

**INTERVENTION PHASE:** Data on implementation of sensory strategies.

Date	Intervention	Desired Outcome		Duration of Observation	Number of Incidents/ Occurrences	Duration of Incidents	Comments
		Yes	No
